

# scribe

This document is a guide to assist you in manually cutting and preparing the necessary components for the scribe project. It provides one-to-one scale templates for precise fitment, ensuring each part is tailored perfectly. Included are:

- A scaled rectangle for trimming the glass tube to the correct size.
- A guide for shortening the pen's cartridge to fit the design.
- Measurements for the tinted foil wrap, calculated for seamless application.

Simply align the physical parts with the printed templates, follow the cutting lines, and you'll have components ready for assembly.
